

**Monoammonium phosphate (MAP) and
diammonium phosphate (DAP) fertilizer,
technical grade — Specification**

TECHNICAL COMMITTEE REPRESENTATION

The following organizations were represented on the Technical Committee:

Government Chemist
Mea Ltd.
Chemagro Ltd
Kenya Plant Health Inspectorate Services (KEPHIS)
Kenya Agricultural and livestock research organization
Yara East Africa Ltd
Kenya Tea Development Agency
University of Nairobi
Ministry of Agriculture, Livestock and fisheries
Amiran (K) Ltd
Toyota Tshusho Fertilizers
Elgon chemicals
Osho chemicals
OCP Kenya Ltd.
Kel Chemicals
Kenya Bureau of Standards — Secretariat

REVISION OF KENYA STANDARDS

In order to keep abreast of progress in industry, Kenya Standards shall be regularly reviewed. Suggestions for improvements to published standards, addressed to the Managing Director, Kenya Bureau of Standards, are welcome.

Copyright: Users are reminded that by virtue of Section 6 of the Copyright Act, Cap. 130 of the Laws of Kenya, copyright subsists in all Kenya Standards and except as provided under Section 7 of this Act, no Kenya Standard may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from the Managing Director.

PUBLIC REVIEW DRAFT

Monoammonium phosphate (MAP) and diammonium phosphate (DAP) fertilizer, technical grade— Specification

KENYA BUREAU OF STANDARDS (KEBS)

Foreword

This Kenya standard has been prepared by the technical committee on fertilizers and soil conditioners under the guidance of the standards projects committee in accordance with the procedures of the Kenya Bureau of standards.

The rapid expansion of horticulture and Irrigated farming has resulted in development of new technologies that aim at maximising nutrient use efficiency and offer opportunities for quick responses to plants nutrients needs. This has resulted to a need to develop special fertilizers that can be applied using these new technologies.

Like other fertilizer products, environmental aspects related to fertilizer raw materials have been taken care of. Thus limits for heavy metals have been specified. Recent Association of official Analytical chemists (AOAC) methods of analysis have been adopted.

During the preparation of this standard, reference was made to the following document:

1. 2012, FAO Mineral fertilizer recommendations.
2. EU Cadmium limits ,2018

Acknowledgement is hereby made for assistance derived from the above source

Monoammonium phosphate (MAP) and diammonium phosphate (DAP) fertilizer, technical grade —Specification

1 Scope

This Kenya Standard specifies the requirements and prescribes the methods of test for Monoammonium phosphate (MAP) and diammonium phosphate (DAP), technical grades of fertilizers.

2 Requirements

2.1 Description

The fertilizer shall be free flowing, in form of granules, crystal, or prills, free from any foreign matter and shall not cake on storage

2.2 Physical

The fertilizer product shall be fully water soluble.

2.3 Chemical

The fertilizers shall comply with the compositional limits specified in Table 1.

Table 1 — Compositional limits

SL NO	Characteristic	Requirement/limits		Test method
		MAP	DAP	
i)	Total nitrogen, % (m/m), min.	11.5.	20.5	AOAC
iii)	Available phosphates, as P_2O_5 , % (m/m), min.	60	52.5	AOAC
iv)	Moisture, % (m/m), max.	0.5	0.5	AOAC
v)	Insoluble matter,%(m/m), Max	0.5	0.5	AOAC
vi)	pH(1% solution),,min	4	7	AOAC

2.4 Heavy metal contaminants

The heavy metal contaminants, if present, shall not exceed the limits stipulated in Table 2.

Table 2 — Heavy metal contaminants limits

SL NO	Parameter	Limits in ppm	Test method
i)	Arsenic, As, max.	20.0	AOAC
ii)	Cadmium, Cd, max.	15.0	AOAC
iii)	Mercury, Hg, max.	0.1	AOAC
iv)	Selenium, Se, max.	1.0	AOAC
v)	Lead, Pb, max.	30.0	AOAC
vi	Chromium, Cr. Max.	500.0	AOAC

3 Packaging and labelling

3.1 Packaging

3.1.1 The fertilizer shall be packaged in materials that ensure the product integrity and quality and protect it against physical damage, chemical and moisture contamination.

3.1.2. The fill of the package shall comply with the weight and measures act CAP 513 of the laws of Kenya

3.1.3 The disposal of used package and condemned fertilizer shall comply with EMCA 1999 no.8 of the disposal of solids and liquid wastes

3.2 Marking/Labelling

Marking/labelling of fertilizer package shall include the following information:

- name and physical address of manufacturer/packer/importer;
- name of the fertilizer, namely MAP or DAP fertilizer; 'technical grade'

- c) guaranteed percentages of nutrient element nitrogen(N) and available phosphates (P_2O_5)
- d) date of manufacture
- e) expiry date;
- f) The form in which the nutrient is present.
- g) the net weight of the fertilizer in the package;
- h) lot number or batch number;;
- i) handling instructions;
- j) Country of origin.

4 Certificate of analysis

A certificate of analysis shall accompany each consignment.

5 Sampling

This shall be carried out as outlined in ISO standards 8633 and 8634.

ISO 8633-Solid fertilizers -- Simple sampling method for small lots

ISO 8634- Solid fertilizers -- Sampling plan for the evaluation of a large delivery
