Standards**

Standards for Quality life

KENYA BUREAU OF STANDARDS

FREQUENTLY ASKED QUESTIONS

REVEIWED IN DECEMBER 2021

About Us

Overview

The Kenya Bureau of Standards (KEBS) is the premier government agency for the provision of Standards, Metrology and Conformity Assessment (SMCA) services since its inception in 1974.

The frequently asked questions document is a commitment by KEBS to improve service delivery to customers and other stakeholders.

It also serves to enhance public awareness on the organization's role.

Mandate

KEBS is mandated to provide Standardization, Metrology, and Conformity Assessment services through:

- Promotion of standardization in commerce and industry.
- provision of testing and calibration services.
- control of the use of Standardization Marks.
- undertaking educational work in standardization.
- facilitation of the implementation and practical application of standards.
- Maintenance and dissemination of the International System of Units (SI) of measurements

Vision

A global leader in standards-based solutions for trade and sustainable development

Mission

To provide Standardization, Metrology, and Conformity Assessment Services that safeguard consumers and facilitate trade for a sustainable future

Core Values

KEBS core Values are:

- Customer focus
- Integrity
- Team Spirit
- Professionalism
- Sustainability
- Patriotism

STANDARDIZATION MARK (S-Mark)

1. What is the Standardization Mark?

The Standardization Mark is a mandatory mark of quality issued by KEBS on all locally manufactured goods which comply with the relevant standards. It is valid for 2 year and is renewable. It is also referred to as S-Mark or SM.

2. Who issues the Standardization Mark?

The Kenya Bureau of Standards issues the Standardization Mark on behalf of the Government of Kenya.

3. Who should apply for the Standardization Mark?

Manufacturers operating in the Republic of Kenya. Artwork, fresh fruits and vegetables, flowers, pharmaceuticals, pesticides are exempted.

4. What is the acquisition procedure?

1. Application using STA/1 form & STA/10
2. Payment of the applicable fees
3. Factory inspection to check compliance with the minimum requirements set in the relevant standards or code of practice.
4. Testing of a sample of the product against the applicable standard.
5. Evaluation and award by the Products Standardization Committee (PSC).

STANDARDIZATION MARK (S-Mark)

5. What is the applicable fee for the S-Mark?

Fees for the mark (for 2 years and exclusive of VAT)

Large Firms

- Manufacturers with a turnover of over Kshs.500, 000 per annum or a group operating under a central point e.g. *NGOs whose quality control activities can be traced to the central body to pay per applicant or group.*
- Kshs. 40,000 for the firm plus Kshs. 15,000 per product/ brand/site (exclusive of VAT).

Medium Enterprises .

- Turnover of between Kshs.200, 000 and Kshs.500,000 per annum
- Kshs. 20,000 for three products and Kshs. 10,000 for any extra product (excluding VAT)

Jua kali and small Enterprises

- Turnover of up to Kshs.200,000
- Kshs. 10,000 for three products and Kshs. 10,000 for any extra product (excluding VAT).

NOTE:

All the payment for standardization mark application shall be made at the time of application.

6. How long does it take upon application to be granted a Standardization mark?

A manufacturer can acquire the Standardization Mark within 8 weeks from submission of the application form to KEBS and all requirements in no.4 above are complied with.

FOOD FORTIFICATION LOGO

What is the Food Fortification mark/logo?

It is a mandatory scheme that allows manufacturers to apply for fortification logo for Wheat flour & Maize Flour (Zn, Fe or Vitamin A) and Edible Oil (Vitamin A), administered by KEBS on behalf of Min. of Health

Any manufacturer applying for Fortification logo must have acquired the S-Mark or D-Mark in accordance with KEBS procedures.

The fees payable for acquiring Food Fortification Mark is Kshs. 20,000 add VAT per product per brand.

DIAMOND MARK (D Mark)

1. What is the Diamond Mark?

The Diamond mark is a voluntary mark of excellence that covers both locally manufactured and imported products. It is issued by KEBS on behalf of the Kenya Government. It is valid for 3 years. It is also referred to as the D Mark.

2. Who should apply for the Diamond Mark?

Any manufacturer who meets set criteria including quality management system (QMS) and complies with the environmental management standard requirements e.g. NEMA certificate/OHSAS

3. What is the acquisition procedure?

- a. Application using the STA/1 and STA/3 form.
- b. Payment of applicable fees.
- c. Compliance to requirement of relevant standards.
- d. Assessment and award by the Permit Approval Committee (PAC).

4. How long does it take to get the Diamond mark?

The period depends on state of readiness and may take up to 9 months from the date of application. i.e. upon submission of the application form to KEBS and payment of applicable fees

DIAMOND MARK (D Mark)

5. What is the fee for the Diamond mark?

Kenyan companies

Kshs. 191,400 [vat incl] per product/brand for 3 years

Foreign companies

USD 4,000 per product/brand per year. i.e. USD 12,000 for the 3 years

The applicant is also required to meet assessors' subsistence allowance as stipulated by the government's Salaries and Remuneration Commission and also the return air fare (Economy class) as applicable.

The applicant is also required to facilitate travel arrangement and local running at destination country

6. What benefits does the Standardization mark and Diamond mark bring to my business?

- a. the product is assured of market access within the East African Community (EAC) member countries due to mutual recognition of the marks issued by the respective National Standards Body in the region.
- b. the product enjoys consumer confidence
- c. the product quality is underpinned by the national quality system

KEBS CERTIFICATION BODY (KEBS CB)

The Kenya Bureau of Standards Certification Body (KEBS CB) is one of the leading certification bodies in the East and Central African region. The KEBS CB started its operations in August 2002 and provides audits and certification services.

1. What schemes does the KEBS CB certify?

Management Systems certification

- ISO 9001 – Quality Management Systems
- ISO 14001 – Environmental Management Systems
- HACCP – Hazard Analysis Critical Control Point
- ISO 22000 – Food Safety Management Systems
- OHSAS 18001 – Occupational Health and Safety Management System
- ISO 27001 – Information Security Management System
- ISO 20000-1 – IT Service Management Certification
- KS 2573 – Hygiene Certification for Food Establishment and Restaurants
- FSSC 22000 – Food Safety System Certification
- ISO 39001 – Road Transport Safety Management System
- ISO 50001 – Energy Management Systems
- ISO 13485 – Medical Devices Certification
- ISO 45001 – Occupational Health and Safety Management System
- ISO 30401 – Knowledge Management Systems
- ISO 14024 – Ecolabelling
- Integrated Management System

KEBS CERTIFICATION BODY (KEBS CB)

The CB also provides the following additional services:

- Personnel Certification compliant with ISO 17024 (Certification of persons scheme of audits, welders and Non-destructive testing personnel.
- Management System automation system using the KEBS-TQM software

2. What are the steps to certification?

Preliminary investigation - When a client expresses interest in a certification service, the KEBS CB determines whether the client is sufficiently prepared for the audit process. The client is requested to complete the initial questionnaire CER/F/01 (can be downloaded from the website (www.kebs.org)). If the client is found not ready, the KEBS CB provides feedback on the gaps identified to the client.

Application - If the client is found to be ready, a cost quotation is done, based on the information given in CER/F/01 and if it is acceptable to the client, the client pays the application fees and the HOD-CB sends the client a commitment letter to undertake the certification process

Note: *Payment of the application fee is an indication that the client has accepted the cost quotation and has read and understood the conditions of contract.*

Stage one audit - Certification audits are done in two stages; *i.e. stage one and two*. This stage 1 audit is done to: Review the client's management system documented information against the normative document requirements. The time period between stage one and two audits is dependent on the gaps identified during stage one audits and is mutually agreed upon between KEBS CB and the client. In any case this time period shall not be more than six months. If the six months lapses before the stage two audit is done, another stage one audit must be performed.

KEBS CERTIFICATION BODY (KEBS CB)

Stage two audit - The stage two audit is done on site and its main objective is to evaluate the implementation as well as the effectiveness of the client's management system. The audits include the examination of at least the following: information and evidence about conformity to all requirements of the applicable management system standards or other normative document, performance monitoring, measuring, reporting and reviewing against key performance objectives and targets, the client's management system and performance as regards legal compliance, operational control of the client's policies, internal auditing and management review process, management responsibility for the client's policies and links between the normative requirements, policy, performance objectives and targets (consistent with the expectation in the applicable management system standard or other normative documents). During this audit, if non-conformities are found, they shall be recorded as either major and/or minor and corrective action plans submitted, effectiveness of the corrective actions evaluated, and a time to carry out the corrective action determined.

Certification process – After the follow-up audit, during which time the corrective action plan from the stage two audits are confirmed to have been carried out, the audit findings and conclusion is evaluated by a peer audit and the certification officer who then makes recommendations to the certification committee. The committee makes the certification decision. Once certified, the certificate is valid for 3 years.

KEBS CERTIFICATION BODY (KEBS CB)

Surveillance: For the contract period, surveillance audits are carried at least once a calendar year except in recertification years.

Recertification: Recertification audits shall be conducted at least two months before the expiry of the certification contract.

The following information is also available on the KEBS website: www.kebs.org:

- Sample contact agreement
- Policy on use of certification mark
- Policy on impartially
- Handling of enquiries, compliments, complaints

3. Is the KEBS CB Accredited?

Yes, the CB is accredited to ISO/IEC 17021-1 by the Dutch Accreditation Council (RVA) as well as the Kenya Accreditation Service (KENAS).

Both RVA and KENAS are full members of IAF

METROLOGY

1. What is Metrology?

Metrology is the science of measurement and its application

KEBS is the custodian of the National Reference Standards of Measurement in Kenya.

2. What services are offered by metrology?

Services offered in Metrology include:

- a) Realization and maintenance of units of measurements, and
- b) Calibration
- c) Training on measurement.

3. What is Calibration?

This is the act of checking and/or adjusting the accuracy of a measuring instrument by comparing it with a Standard instrument of higher accuracy which has traceability to the international system of units (SI).

4. What equipment can be calibrated?

Equipment used in industries, research, educational institutions, aviation and the health sector etc.

Examples of equipment are:

Weighing scales/ balances, incubators, clinical thermometers, temperature controllers, blood pressure machines, flow meters, tanks, ovens, cold rooms, pressure gauges, noise level meters, pH meters.

METROLOGY

Examples of equipment (*Cntd*):

spectrophotometers, light meters, acoustic/ultrasonic devices, x-ray machines, large storage tanks
Material testing machines, Hardness testing machines, torques wrenches, load cells, torque meters,
Vernier callipers, micrometres, GO and NO GO gauges, dipping tapes, tachometers, stop watches,
oscilloscopes, generators, density meter, viscometers and hydrometers etc.

5. What metrology laboratories are available?

a) Mechanical metrology laboratories

- Density and viscosity laboratory
- Force, torque and hardness laboratory
- Length and industrial measurement laboratory
- Mass and balance calibration laboratory
- Pressure and vacuum laboratory
- Temperature laboratory
- Volume and flow laboratory

b) Electrical metrology laboratories

- Photometry laboratory
- Acoustics and Vibration laboratory
- Dosimetry laboratory
- AC/DC laboratory
- Time and Frequency laboratory
- Energy and Transformer laboratory
- Medical equipment calibration laboratory

METROLOGY

c) Support units

- Instrumentation workshop
- Mechanical workshop

6. Who needs Metrology services in Kenya?

- Service industries.
- Construction industries.
- Hospitals.
- Research, Universities and technical and vocational training institutes
- Manufacturers and Producers, amongst others.
- Oil industries
- Accredited laboratories
- Aviation Industries
- Steel production Industries
- Sports
- Regulators
- Mining Industries
- Shipping Industries
- Transport Industries
- Farmers
- SME's
- Automobile Industries
- Military
- Railway

NATIONAL QUALITY INSTITUTE (NQI)

1. What is NQI?

NQI is a department within KEBS which is charged with the responsibility of entrenching a culture of quality within Kenya through practical application of standards, training and process improvement.

2. What is the role of NQI?

The National Quality Institute offers various services including:

- Training on ISO management systems standards and quality improvement
- Training SMEs for practical application of standards in the industry
- Membership registration scheme for recognition of quality practitioners
- Undertaking surveys on quality related issues
- Offers Quality awards to recognize SMEs that embrace quality
- Collaboration with other institutions to promote a culture of quality

3. How can I get more information on NQI?

Visit the KEBS website or send an email to nqi@kebs.org for further information.

MARKET SURVEILLANCE

This is a Directorate within Kenya Bureau of Standards charged with the responsibility of protecting consumers from a substandard or unsafe product. This responsibility is carried out in the Market at the point of sale. The Directorate does this through a routine Market Surveillance and complaint investigation.

1. What is the role of Market Surveillance?

- To monitor the compliance to Standards of products sold in the Market
- Conducting/ carrying out consumer complaints
- Market Surveillance participate in Multi Agency activities
- The Directorate is charged with enforcing Standards (Seizures, prosecution and any other unrelated sanctions)
- Create awareness on Standardization issues to the public and stake holders

2. What are the Objectives of Market Surveillance?

To protect consumers from substandard or un safe goods through the aforementioned activities

PRE-EXPORT VERIFICATION OF CONFORMITY (PVOC)

1. What is PVOC Program?

PVOC stands for Pre-export Verification of Conformity to standards. PVOC Program is a conformity assessment program applied to products at the respective exporting Countries, to ensure their compliance with the applicable Standards and Regulations.

2. What are the Objectives of the program?

- To ensure quality of products, health and safety, and environmental protection for consumers.
- To facilitate trade by ensuring that compliant goods are given expedited clearance at the port of entry.
- To safeguard the country from unfair trade practices and dumping of substandard goods by ensuring that imported products comply with the same requirements to which locally manufactured goods are subjected.
- To safeguard the country's national security.
- To prevent deceptive trade practices.

3. Are products bearing other certification marks exempted from the new regulations?

These are not new regulations, PVoC program has been in operation since July 2005 and all products apart from those exempted in the schedule legal notice 78 and covered under the product

4. Who inspects goods from the country of origin?

Inspection of goods at the country of origin/supply is done by agents contracted by KEBS. Information on the agents contracted and the countries of responsibilities can be accessed on the PVOC manual published in the KEBS website: www.kebs.org

PRE-EXPORT VERIFICATION OF CONFORMITY (PVOC)

5. Are personal effects covered under PVOC program?

No. Personal effects for returning residents are exempted subject to approval by KRA.

6. How often can the certificate of conformity (COC) be used?

COC are consignment based and are specific for a particular consignment

7. Can KEBS accept a test report/certificate issued by the manufacturer of the same goods provided that they have ISO 17025 accredited laboratory?

Test reports issued by the manufacturer's laboratory can be accepted for the purpose of issuing a COC provided the laboratory is accredited to ISO 17025. Such goods still require certificate of conformity (COC).

8. Are raw materials covered under PVOC program?

Raw materials imported by registered manufacturers with KEBS and whose end products are certified to the local standardization mark of quality in Kenya are exempted from the requirements of PVOC program. Manufacturers are required to apply for the exemption of their raw materials, machinery and parts thereof using an application form available in the KEBS website: www.kebs.org

PRE-EXPORT VERIFICATION OF CONFORMITY (PVOC)

9. What is the role of KEBS in the inspection of Medical devices?

KEBS inspect medical devices to ensure compliance to the applicable standards to be inspected at the country of origin.(COC)

LOCAL INSPECTION

What happens to consignments that are accompanied by ministerial wavers /exemption?

These consignment are subject to destination inspection by KEBS.

TESTING

1. Functions of Testing Services

- a) The primary function of the Testing Services Department is to provide tests or measurements in areas of Chemistry, Engineering, Polymer and Microbiology for Conformity Assessment.
- b) It provides testing services to a wide range of clientele that include, but are not limited to: manufacturers, importers, exporters, non-governmental organizations, government departments, research institutions, merchants and KEBS quality inspectors who implement Kenya Standards.

2. What Testing Services are provided?

The laboratories test both locally manufactured and imported goods for compliance with Kenyan standards, regional standards, international standards and/or customer supplied standards/requirements.

3. What products can be tested?

- Food and agricultural products.
- Electrical and mechanical engineering products.
- Building and construction materials.
- Farming implements.
- Utensils.
- Textile products — fibres, yarn, fabrics etc.
- Water and effluents.
- Healthcare products.
- Emissions and gases.
- Petroleum, soaps, spirits, cosmetics, plastics, paints, paper, rubber and writing material just to name a few.

TESTING

4. How much does it cost to test my product?

Testing charges are dependent on:

- Product.
- Number of tests.

5. Which testing laboratories are available at KEBS?

- Food and agriculture laboratory.
- Organic chemistry and petroleum laboratory.
- Inorganic chemistry laboratory.
- Electrical engineering laboratory.
- Civil engineering laboratory.
- Mechanical engineering laboratory.
- Microbiology laboratory.
- Textile engineering laboratory.
- Polymer laboratory.
- Molecular biology/or GMO testing laboratory.
- Gas laboratory.

A detailed scope of testing for each product can be availed on request.

TESTING

6. How long does it take to test my product?

The time taken to test your product is determined by:

- Sample type.
- Number of tests per sample.
- Specific test per approved sample.
- Method of analysis.

Test results are released within 14 working days. Exceptions to this will be dictated by the test procedure, product type and existing workload. Any deviation from the set timelines will be communicated.

7. Are KEBS test reports recognized worldwide?

KEBS laboratories are ISO 17025: 2017 accredited by the South African National Accreditation System (SANAS) and accredited tests results are recognized globally. This means that our results are internationally recognized.

8. Why should I get my products tested?

- To ensure safety to the consumer,
- To make sure that the manufactured products adhere to good manufacturing practices,
- To ensure that the product quality complies with requirements of the relevant standard, and
- To protect the environment.

STANDARDS LEVY

1. What is the Standards Levy?

It is an amount payable by manufacturers to KEBS at the rate of 0.2% of the monthly turnover excluding VAT and discounts if any. The minimum amount payable is Kshs. 1,000 per month and maximum is Kshs.400, 000 per annum.

This is in accordance with Section 3 of the Standards Levy order of 1990.

2. What is the procedure for registration?

All manufacturers are required to notify the Managing Director of KEBS of their operations or intention to manufacture by filling in an SL/1 form. These forms are available at all KEBS offices and in the KEBS website.

The Finance Bill 2000 appointed Kenya Revenue Authority (KRA) the collecting agent for KEBS levy. Thus, payments are made through the ITAX platform, agency levies.

3. When should the payments be made?

Levy for a particular month falls due on or before the 20th day of the month succeeding that of manufacture.

4. When should payments start?

Submission of monthly returns should start from the time (month) of commencement of operations.

5. What happens if Standard Levy is not paid within the prescribed time?

A penalty at the rate of 5% per month on a cumulative basis shall be imposed for each month that the amount due remains unpaid.

STANDARDS

1. What is a Standard?

A standard is a technical document developed through consensus detailing the requirements necessary to ensure that a material, product, service, or procedure is fit for its intended purpose. Standards serve as a guide for production of goods and provision of services, and are a basis for trade transactions.

2. Who initiates standards development?

Stakeholders: consumers, academia, industry, professionals, government, relevant associations and any interested party can request for initiation of standards development.

3. Who is affected by Standards?

Standards affect everybody including but not limited to; manufacturers, importers, exporters, consumers, regulators and all interested publics.

4. What is the difference between a standard, regulation and technical regulation?

- **Standard**

This is a document, established by consensus and approved by a recognized body, that provides for common and repeated use, rules, guidelines or characteristics for activities or their results, aimed at the achievement of the optimum degree of order in a given context

NOTE: Standards should be based on the consolidated results of science, technology and experience, and aimed at the promotion of optimum community benefits.

STANDARDS

- **Regulation**

Document providing binding legislative rules, that is adopted by an authority

- **Technical regulation**

provides technical requirements, either directly or by referring to or incorporating the content of a standard, technical specification or code of practice.

NOTE: A technical regulation may be supplemented by technical guidance that outlines some means of compliance with the requirements of the regulation

5. How can I access Standards?

Standards are available at the Standards Information Resource Centre (SIRC) based at KEBS Headquarters and at all regional offices at a fee. The SIRC is open to all members of the public. You may also purchase a standard online through the link: <http://webstore.kebs.org>

6. How can one know which Standards have been developed?

There is a catalogue of developed standards which is available online on <http://onlinecatalogue.kebs.org>

7. How can I request for the development of a new standard or review of an existing standard?

Requests for the development/revision of a standard can be made through the link: <https://www.kebs.org/sqmt/pss/propose.html>

STANDARDS

8. What is the advantage of the Standard?

- The advantages include:
- Enhancement of quality and reliability
- Safety and environmental protection measures
- Minimization of wastage
- Reduction of costs
- Reduction of unnecessary varieties
- Promotion of interchangeability
- Increased productivity in the industry.
- Transparency in production information
- Suitability of products for vulnerable population
- Credibility of Standards to support consumer protection hours
- Choice and fair competition

STANDARDS INFORMATION CENTRE (SIC)

1. What is the role of the Standards Information Centre?

The Standards Information Centre (SIRC) was established on the basis of the International Organization for Standardization Information Network (ISONET) and is designed to promote dissemination and the flow of information on standards and related documents.

STANDARDS

2. What information/services can I access at the SIC?

You can access the following information/ services:

Distribution/circulation of:

- Kenya standards,
- Standards from various national, regional, and international standards bodies,
- Technical books and current newspapers, and
- Complete set of the Laws of Kenya.

Online Catalogue

- Which Kenya Standards have been developed so far?
- You can be able to see a list of all Kenya standards developed so far by searching in the Kenya standards online catalogue – <http://onlinecatalogue.kebs.org>.
- You can search by product, KS number, TC name in addition to free-text searching.

Sale of Kenya standards

- What format are Kenya standards available?
- The Kenya standards are available in both Printed format and Electronic (PDF) format.

Where can I get Kenya standards?

Kenya standards are available at the following areas:

- Standards information Centre at KEBS Headquarter
- KEBS Regional offices located at Mombasa, Kisumu, Nakuru, Eldoret, Nyeri and Garissa.

STANDARDS

2. What information/services can I access at the SIC?

You can access the following information/ services:

Distribution/circulation of:

- Kenya standards,
- Standards from various national, regional, and international standards bodies,
- Technical books and current newspapers, and
- Complete set of the Laws of Kenya.

Online Catalogue

- Which Kenya Standards have been developed so far?
- You can be able to see a list of all Kenya standards developed so far by searching in the Kenya standards online catalogue – <http://onlinecatalogue.kebs.org>.
- You can search by product, KS number, TC name in addition to free-text searching.

Sale of Kenya standards

- What format are Kenya standards available?
- The Kenya standards are available in both Printed format and Electronic (PDF) format.

Where can I get Kenya standards?

Kenya standards are available at the following areas:

- Standards information Centre at KEBS Headquarter
- KEBS Regional offices located at Mombasa, Kisumu, Nakuru, Eldoret, Nyeri and Garissa.

WAJIBIKA NA KEBS

Wajibika Na KEBS is an initiative by the Kenya Bureau of Standards (KEBS) that encourages collaboration between KEBS and Kenyans in the fight against the sale of substandard products in the country. The initiative encourages Kenyans to participate in market surveillance by being on the lookout and to inform KEBS upon encountering any products suspected to be substandard. It also encourages manufacturers to abide by quality standards and retailers to only sell certified products.

The initiative provides an interactive and collaborative platform through which the public can report suspected substandard products on sale via KEBS customer touch points including KEBS Official App, E-mails, SMS, Regional official numbers, and Toll-Free Number.

To Wajibika Na KEBS, verify the authenticity of KEBS quality marks by sending the code underneath the quality mark to **20023**. For example, **SM#Permit number** for Standardization Mark, **DM#Permit number** for the Diamond Mark of Quality, **ISM#UCR number** for Import Standardization Mark, For the Fortification Mark (FM) **FM#Permit Number** to get product certification details.

Individuals can also verify staff and chassis number of motor vehicle by sending the staff number to **20023** for example **HR#Staff** number and **CH#Chassis number**. For simplified searches, individuals can download the **KEBS Official App** on Google Play and Apple App Store or visit any of our offices countrywide for further assistance.

If the details are different, or indicates that the permit is expired, please report to **KEBS Toll Free Number 1545** during official working hours of 8.00 AM to 1.00 PM and 2.00 PM to 5.00 PM, Monday to Friday, Except for public holidays.
