GOHOLE AKARANGA ARTHUR
Environmental Health Specialist

SUMMARY

I am a highly skilled, versatile and creative Professional with eight years’ experience in the Public Health Sector. I present wide range of experience in providing Environmental Health Solutions in a multi-sectoral settings for both government and donor funded projects. Over the years I have continuously been involved in monitoring and evaluation for a number of public health projects. In the process I have been able to gain much understanding for key monitoring and evaluation concepts for various funding models such as Global Fund, USAID, DFID & the recent being a Turnkey flagship Project.

I have also been able to learn and share experience in policy making especially in healthcare waste, pollution control and climate change in Kenya. This provided an opportunity where I was selected as one of the pioneers behind the establishment of National Healthcare Waste Management Public Private Partnership Framework and National Healthcare Waste Management Monitoring and Evaluation Framework, (2017 to 2019). Previously in 2016 I had also been involved in the review of the National Standard Operating Procedures for Healthcare Waste Management, Injection Safety Communication Strategy zero draft and Menstrual Hygiene Management Policy zero draft. I am currently a master trainer of trainers on healthcare waste management in the country with biasness to non-burn technologies. I am also a master trainer on community led-total sanitation monitoring and evaluation database in the country.

Professionally I am qualified public health specialist with a Bachelor of science degree in environmental health from Moi university. I am also a holder of other professional trainings such as monitoring and evaluation for health projects with biasness to HIV, climate change and sustainable agriculture.

My career objective is to be a reliable expert in environmental health sector who strives to utilize available limited resources to meet the “One Health Concept” demands for the global communities. I am very passionate towards strengthening of Public Private Partnership in the health sector with aim of promoting services delivery through high impact Health Investments. I am also a passionate career guide with abilities to design and conduct environmental health mentorship sessions for adolescents, youth and young adults in secondary and tertiary institutions.
