- Applying data management and approaches to analytical and reporting processes within each department.

CHANDARIA GROUP OF COMPANIES.

July, 2010 – 1st July, 2017.

Shift Production – In charge (Paper mill).

OVERALL PURPOSE OF THE JOB.

As a Production Supervisor I was in charge of all production teams in the factory in a shift .I coordinated, facilitated, and guided the teams in production and related issues and challenges in a shift. I was the overall person in charge to ensure that shift production is as per the set targets and met the customer's standards and quality.

DUTIES OF THE JOB.

- Plan raw material required for the shift and ensures it has been issued.
- On line analysis of the product quality and specifications by ensuring standard operating procedures (SOPs) are observed and maintained through process layout implementation and ISO 9001:2015.
- Co-ordinate, plan and ensure any mechanical, electrical, process repairs are done within agreed time frames.
- Co-ordinate and ensure all support activities to production are working and producing as per set parameters to continue: Boilers, Fuel oil 1300litres per day, Biomass boiler steam production to be 5.5tonnes/hour. Compressor 8.5 bars at all times, Transport drivers are in place.
- Find out bottlenecks affecting production teams in production, teamwork and resolve or escalate to senior staff.
- Monitor performance of everyone in the teams and take appropriate disciplinary as recommended by management.
- Implement all safety measures as recommended by the OH & Safety committee and management.
- Report any equipment that needs repair or additional safety measures needed to the production to the Mill manager for facilitation.
- Implement any recommendations given by management for continuous improvement.
- Always look and recommend ways for continuous improvement in terms of efficiency, reducing production losses, and improving quality.
- Developing and maintaining of standardized and safe working procedures for new equipment installed in the process through training of the operators and one point lessons (OPLs)
- Developing and implementation of Kaizen projects i.e. through continuous improvement projects
- Ensuring improved production efficiencies through Overall Equipment Effectiveness (Availability X Performance X Quality).
- Ensure reduction of Muda, Muri and Mura in production by reducing re-works, re-processing and unplanned downtime by observing pull production system

PAN AFRICAN PAPER MILLS LTD.(2005)

STUDENT INTERN.

I was exposed to the following: Chemical/Soda recovery plant,Evaporators,Condensors,Furnace,Digestors,Pulp bleaching processes, Liquor charging and entrainment, Lime kiln process, Ion exchange and regeneration processes, Paper machines 1,2,3 & 4,Drying operations,Calendering and winding operations, Electrolysis of brine.etc
