1. INTRODUCTION

1.1. Genesis of the EAC Regional Standardization Plan

The Development of Regional Standardization Plan (RSP) is a response of the implementation of the EAC- SQMT Strategic Plan 2018-2022, which among others, required the development of the Regional Standardization Plan with objective to prioritize standardization project to optimize the scarcity resources, while facilitating regional and international trade. The 21st meeting of the EASC directed the SMC to develop the Standardization Plan in order to achieve the prioritization of standards harmonization process in the EAC.

The development of RSP is aimed to trigger the harmonization of standards based EAC economy by focusing on Intra EAC Trade and EAC and the rest of the world through increasing number of standards which will not only facilitate trade but also reduce technical barriers barrier to trade, resulting into an increase in trade volume through quality products and sustaining regional economic development.

1.2. Development of EAC RSP

The EAC Regional Standardization Plan (RSP) provides a framework for deciding how to use limited regional standardization resources through prioritization and planning in short and medium-term perspectives.

Upon completion of RSP and adoption of the East African Standards, the following benefits will be realized;

- **Positive** regional economic impact in terms of enabling trade and economic development (Strengthen the GDP, move EAC export share and enhance productive sectors priorities envisaged).
- **Positive** impact on the People of East Africa (Greatest Social good in terms of people's daily lives as a result of improved trade).
- **Strong** support by industry, business and the public as a result of improved stakeholder engagement in coming up with the plan. This will subsequently lead to greater uptake of published standards.

The Regional Standardization Plan should be understood as a call to action for all stakeholders to contribute to its consistent implementation.

In addition, this plan provides a framework for supporting the EAC SQMT Strategic Plan 2018-2023, and the provision of the EAC SQMT Act through standardization.

This plan has been prepared by the Standards Management Committee (SMC) following extensive engagement process with stakeholders and it has been approved by East Africa Standards Committee (EASC) for implementation during three-year period 2020 - 2023. To keep abreast with technology changes, global dynamics and overriding factors, this three year-plan will be reviewed annually.

During the development of this document, the following Stakeholders were consulted:

- i)* Technical Committees(TCs);
- ii)* The private sector (Industry, Business Sectors);
- iii)* MSMEs and related associations;
- iv)* Consumers and Consumer Organizations;
- v)* Government Agencies;
- vi)* Export promotion agencies;
- vii)* Learning & Research institutions;
- viii)* Non-Governmental Organizations(NGOs);
- ix)* Business Support Organizations(BSO) and;
- x)* Financial Institutions.

During the preparation of this plan reference and benchmarking was made to the following publications and information sources:

- i)* ISO Draft Manual on Developing National Standardization Strategies, February 2017
- ii)* EAC Vision 2050
- iii)* EAC 5th Development Strategy 2016/17-2017/2021
- iv)* Kenya National Bureau of Statistics (KNBS)Economic survey 2018
- v)* Rwanda National Institute of Statistics (NISR) Economic survey 2018
- vi)* Tanzania National Bureau of Statistics (NBS) Economic survey 2018.
- vii)* Burundi Bureau of Statistics (ISTEEBU)
- viii)* EAC SQMT Strategic Plan for 2018-2022
- ix)* EAC Industrialization Strategy 2012 - 2032
- x)* East African Community Facts and Figures (2016) Report
- xi)* International Trade Centre data (ITC) (2018)

2. SUMMARY ON REGIONAL PRIORITIES AND EXPECTED BENEFITS

2.1. Economic Priorities (Economic Impact)

The development of Regional Standardization Plan (RSP) is based on the assessment of EAC economic priorities. The Intra EAC Trade and EAC and the rest of the world and the contribution of various sectors to GDP were considered in ranking the important sectors of the economies.

The following ranking criterion based on ISO Manual for Developing National Standardization Strategies was used in coming up with **table 1** below:

Rank1	>10% of GDP
Rank2	5-10% of GDP
Rank3	1-5% of GDP
Rank4	0.2-1% of GDP
Rank5	<0.2% of GDP

Table 2 below represents key economic sectors based on their contribution to EAC export earnings.

The following ranking criterion based on ISO Manual for Developing National Standardization Strategies was used:

Rank1	>10% of EAC export earnings
Rank2	5-10% of EAC export earnings
Rank3	1-5% of EAC export earnings
Rank4	0.2 -1% of EAC export earnings
Rank5	<0.2% of EAC export earnings

2.2. Non-Economic Priorities (Social Impact Strategy)

In addition to supporting economic growth, Standardization supports Non-economic dimensions (**social good**) for sustainable development namely societal equity and Environmental integrity. Societal equity issues include Ethics, Fair trade, Security, Health services, Water Protection and Consumer Protection.

Environmental integrity issues include waste management, water/soil/air quality, Energy efficiency and renewable resources, Green House Gas Emissions and climate change, Life cycle analysis and green labeling and Environmental management.

In order to ensure that the RSP is designed to promote EAC sustainable development, an analysis of non-economic issues has been undertaken in this plan. These are mainly non-economic media issues (print and social media) that have been causing concern to the public lately.

Analysis of public concerns recently aired by newspapers and media bring us a number of non-economic issues important for standardization. The results are summarized in the Table3 below, which specifies non- economic priority Sectors and Fields of activities covered within the plan. The following ranking criterion based on ISO Manual for Developing National Standardization Strategies was used:

- Rank 1 – Very serious and urgent problem, public outcry
- Rank 2 – Serious problem, common occurrence, media attention
- Rank 3 – Serious problem, some media reports
- Rank 4 - Problem localized, no media reaction
- Rank 5 – Other issues

2.3. EAC Regional Policy Priorities

Further to the non-economic factors, it is important to analyze the EAC Regional plans for development that greatly impact on some specific sectors.

Priority sectors in Table 4 are based on EAC 5th Development Strategy Program for 2016/17-2020/2021, EAC Industrialization Strategy 2012 – 2032, EAC Vision 2050, and policy directives among other documents.

The economic sectors expected to have greater importance according to development plans are summarized in the Table 4 below. The following ranking criterion based on ISO Manual for Developing National Standardization Strategies was used:

- Rank1–Great importance expected in near future
- Rank2–Greater importance, if certain conditions are fulfilled
- Rank3–Some importance expected in medium term
- Rank4–Some importance expected in long-term
- Rank5–No increase in importance expected.

2.4. Stakeholders Engagement

During the formulation of this plan, stakeholders were engaged through surveys, meetings, workshops and electronic platforms. The information from stakeholders was used for ranking and the results are summarized in Table 5.

2.5. Selected Sectors of Standardization and Expected Benefits

2.5.1. Selected sectors of standardization

Based on the average ranking for the four Socio-economic indicators namely GDP contribution, EAC Export Contribution/Earnings, Non-Economic factors and Regional development plans, an average general **sector priority ranking** was calculated for each economic sector, sub-sector and stakeholder request.

Table 5 below gives a summary of the priority sectors for Standardization based on sector and stakeholder rankings. The ranking criterion is based on ISO Manual for Developing National Standardization and is an average of sectorial and stakeholder priorities, with 1 being the highest and 5 the lowest priority ranking.

2.5.2. Benefits of selected sectors and sub-sectors of standardization

This plan provides a Strategy for Prioritization of Standards that if completed and implemented would:

- i) Have the greatest positive Regional Economic impact in terms of enabling trade and economic development and received strong industry and business support; and
- ii) Have a visible, positive, impact on citizens (social good), and would likely receive strong public support.

Table 7 – Summary of benefits on implementation RSP
